

SRIRAM RAVICHANDRAN

Full-Stack & Backend Software Engineer | Experienced in Scalable Systems, REST APIs, and Cloud-Native Applications | Skilled in Databases, Data Structures and Algorithms DSA, Distributed Systems & Modern Web Development

EDUCATION

Illinois Institute of Technology, Chicago, Illinois — Master of Science, Computer Science, GPA 3.50 **AUG 2024 – MAY 2026**
Sri Eshwar College of Engineering, Coimbatore, India — Bachelor of Engineering, Computer Science and Engineering, **MAY 2019 – APR 2023**
GPA 3.66

SKILLS

PROGRAMMING LANGUAGES: Python | Java | JavaScript (ES6+) | TypeScript | Go (Golang) | Kotlin | C++ | C | SQL | HTML5 | CSS3
FRAMEWORKS & AI INFRA: LangGraph | LangChain | AutoGen | Multi-Agent Orchestration | Agentic AI | RAG Architecture | Prompt Engineering | LLM APIs (OpenAI, Anthropic Claude) | React.js | Next.js | Node.js | FastAPI | RESTful APIs (Jersey, Ktor) | WebSockets | Java Servlets | Jetpack Compose
DATABASES & VECTOR SEARCH: PostgreSQL | MySQL | MongoDB (NoSQL) | Elasticsearch | Vector Databases | Vector Embeddings | Semantic Search | Graph Databases | Data Deduplication (SHA-256)
CLOUD, DEVOPS & DISTRIBUTED SYSTEMS: AWS | Microsoft Azure | Docker | Kubernetes | Apache Kafka | Git | GitHub | GitHub Actions | CI/CD | Linux | Microservices Architecture | System Design | Peer-to-Peer (P2P) Systems | Embedded Servers
ENGINEERING PRACTICES: Agile/Scrum | Code Reviews | Unit & E2E Testing (Playwright) | Debugging & Troubleshooting
LANGUAGES: English (Fluent) | Tamil (Native)

WORK EXPERIENCE

AI AGENT DEVELOPER INTERN — NeuralSeek, Miami, Florida, United States (REMOTE) **OCT 2025 – NOV 2025**

- Engineered a RAG-powered AI agent using NeuralSeek, implementing automated data lineage to guarantee verifiable citation accuracy and minimize model hallucinations.
- Optimized LLM response quality through advanced prompt engineering and ethical guardrails, ensuring the final deployment met strict security and scalability standards.

MEMBER TECHNICAL STAFF — Zoho Corporation, Chennai, India **JUNE 2023 – JULY 2023**

- Resolved high-priority support tickets, applying fixes that were reflected across 10,000+ Apple devices, boosting system functionality, stability, and user satisfaction.
- Collaborated with front-end developers to ensure smooth integration of REST APIs, providing necessary support for API usage and troubleshooting.

PROJECT TRAINEE — Zoho Corporation, Chennai, India **AUG 2022 – MAY 2023**

- Detected and resolved key glitches in the MDM system that allowed users to bypass restrictions, increasing system security and reducing policy violation cases by ~10%.
- Created comprehensive product feature documentation, reducing onboarding time for new developers, and gained hands-on experience in debugging, troubleshooting issues, and worked on smaller tasks or features in the product.

SUMMER INTERN — Zoho Corporation, Chennai, India **MAY 2022 – JUNE 2022**

- Acquired proficiency in backend development by working with various programming languages, frameworks, and tools.
- Worked closely with senior developers through regular code reviews and mentorship, fostering significant improvements in code quality, best practices, and team collaboration.

PROJECT EXPERIENCE

SmartHomes

- Developed a scalable e-commerce platform using React and Servlets, with MySQL and MongoDB. Integrated Elasticsearch for fast search, Docker for containerization, and an OpenAI assistant for a personalized shopping experience and real-time support.

MediaBridge

- Developed a two-node Android media sync app using Kotlin and Jetpack Compose, with a Ktor embedded server for peer-to-peer transfers, SHA-256 deduplication, chunked resumable uploads, automatic device discovery, and Google Photos as final sync destination.

StackGet

- Built a cross-platform Go CLI tool available in npm that scans a developer's machine to detect all installed tools and versions, with native OS registry/GUI app discovery, concurrent execution, and YAML/JSON environment snapshots with drift-checking.

HelpNest

- Built an open-source AI-first customer support platform (Next.js, PostgreSQL, Turborepo) with a conversational AI agent (Anthropic/OpenAI/Gemini/Mistral) that answers from a knowledge base via Qdrant vector search, citing sources and escalating uncertain questions to a human inbox.

HONORS AND ACHIEVEMENTS

Interizon Hackathon 2021 – Winner
Freshathon Project Expo 2024 – Jury

JAN 2023
JUNE 2024
